MINERAL CLASSIC

Sugar-free liquid mineral and multivitamin supplement.

DESCRIPTION

Modern lifestyles and processed foods don't always make it possible to consume all the nutrients your body needs. Minerals help activate many of the body's functions but our bodies don't produce minerals so we rely on getting them through diet or supplements.

Mineral Classic is a highly nutritious food supplement specially formulated to ensure the body receives the optimum daily intake of minerals and vitamins. It comes in a convenient liquid format that the body can easily digest.

It contains the same unique blend of 52 minerals as Mineral Solutions, plus essential B-vitamins, amino acids and phytochemicals but, unlike its sister version, Mineral Classic doesn't contain plant extracts or natural fruit sugars.

FEATURES & BENEFITS

- Packed with minerals and trace minerals to counter dietary shortfalls.
- Ionic suspension ensures not only the availability but also the stability of the all nutrients included.
- Minerals derived from the area surrounding the prehistoric Great Salt Lake region in Utah.
- A simple, convenient way to supplement your diet with essential minerals and B-vitamins.

MINERAL CLASSIC

Sugar-free liquid mineral and multivitamin supplement.

KEY INGREDIENTS

Provides a rich source of essential dietary minerals including:

- **Vitamin B12** – contributes to the reduction of tiredness and fatigue
- **Biotin** - contributes to normal energy-yielding metabolism
- **Chromium** – contributes to normal macronutrient metabolism.
- **Iodine** – contributes to normal energy-yielding metabolism and normal functioning of the nervous system.
- **Molybdenum** – contributes to normal sulphur amino acid metabolism.
- **Selenium** – contributes to the protection of cells from oxidative stress and to the normal thyroid function.
