

MÖDERE. CELLPROOF

BIOCELL COLLAGEN® CG
PATENTED, AWARD-WINNING COSMECEUTICAL BREAKTHROUGH.

THE SCIENCE OF CELLPROOF

† The 2020 Beauty Shortlist “Green & Gorgeous” Editor’s Choice was awarded to Modere CellProof Serum and Moisturizer.

THE SCIENCE

Dull skin, deepening wrinkles and an aging jawline seem inevitable as you age.

That's because with age, the body's levels of collagen and hyaluronic acid – compounds critical to skin firmness, hydration and smoothness – naturally decrease. This affects skin's hydration levels and collagen network. Skin is drier and rougher, wrinkles are more common with greater depth, and skin tone becomes less even with an aged appearance.

These changes begin in our 20s and are made even more pronounced by environmental exposure, pollution and stress.

HYALURONIC ACID & COLLAGEN LEVELS DECLINE WITH AGE

COLLAGEN/HA

Modere[®] CellProof remarkably renews skin appearance with Collagen/HA Matrix[®] Technology.

Modere CellProof is an advanced skin care system that uses a ground-breaking hyaluronic acid and collagen peptide ingredient backed by patented, award-winning Collagen/HA Matrix[®] Technology, shown to help visibly diminish signs of aging and promote the look of youthful vibrance and skin health.

Combining this advanced collagen peptide with a science-backed skin tightening complex and antioxidants, Modere CellProof Serum is unique in its approach to firm and protect skin's appearance and deliver rapid, dramatic results[‡] you can begin to see in less than 5 minutes!

Our key ingredient - with patented, award-winning Collagen/HA Matrix[®] Technology

Cosmetic-grade BioCell Collagen[®] CG features the same Collagen/HA Matrix[®] Technology that's the foundation of our award-winning Liquid BioCell[®] supernutraceutical products. In Modere CellProof, it moisturizes the skin from the outside to increase the appearance of youthful plumpness while reducing the appearance of fine lines. In Liquid BioCell, this patented technology nourishes the skin from the inside, diminishing wrinkles, promoting hydration, enhancing firmness and increasing elasticity.*
